PROFILE

I am a technical designer with a wealth of experience in game development, including various areas of design as well as programming and problem solving. I am proficient with Unreal Engine and Unity and have experience with a range of creative software tools such as Adobe Photoshop and Blender. I have the collaboration and communication skills to work well in a team and the drive and self-motivation to produce results when working independently.

EDUCATION

University of Central Lancashire

MA Games Design

Results pending

Preston, Lancashire

2024-2025

University of Leeds

BSc Computer Science

2:1

Leeds, West Yorkshire

2021-2024

Cardinal Newman College

A-levels

Computer Science – A*, Mathematics – A, Graphic Design – A

Preston, Lancashire

2019-2021

Broughton High School

GCSEs

Achieved 9 GCSEs grades 9 – 6 including Maths and English, with an overall average of 8.3

2014-2019

WORK EXPERIENCE

Loops Direct

Data Entry Assistant

Preston, Lancashire
July 2024 - December 2024

- Restructuring the company website to organise products more conveniently
- Using Python and Microsoft Excel to improve filters on products
- Editing product information to meet external retailers' guidelines
- Taking on miscellaneous tasks for the company, designing an advertisement, for example

University of Leeds

Web Development Internship

Leeds, West Yorkshire
July 2023 - July 2024

- Working on a project belonging to a member of staff at the university
- Planning and developing a website using Python, HTML, JavaScript, and CSS
- Working with other members including designers
- Presenting work to potential clients

TECHNICAL SKILLS

- **Experience with multiple operating systems:** Windows, Mac, Linux
- **Proficient in Microsoft Office:** Word, PowerPoint, Excel, Access, OneNote
- **Proficient in creative software:** Adobe Photoshop, Adobe Illustrator, Unity Game Engine, Blender
- **Experience with programming tools:** VSCode, Azure, GitHub, GitLab, Command Line Interface, Qt
- **Experienced programming:** Python, C, C++, C#, Java, JavaScript, HTML, CSS, SQL, Assembly

ACADEMIC PROJECTS:

- **A-level game development coursework:** A platform/shooter game made entirely independently using Unity and C# as a computer science coursework assignment
- **Programming Project Coursework:** Challenging C programming and debugging tasks that also developed source control skills using Git
- **Software Development project:** Software design brief, suitable for a software development team to use in order to establish technical feasibility
- **Computer Graphics projects:** Programming in C++ to create a 2D interactive environment and a 3D one as a group project
- **Web-based coursework projects:** 4 assignments based around the creation websites using HTML, as well as other languages such as JavaScript, CSS, Python, and SQL
- **Robotics project:** Group project with a 4-person team programming a robot to navigate an environment
- **Top-down puzzle game:** A tile-based game concept in which the player must guide three characters to the exit of each level by carefully planning their paths
- **First person adventure game:** A game concept involving the manipulation of energy in and out of objects
- **First/third person shooter mechanics:** An investigation into how shooting mechanics are programmed into games
- **Multiplayer strategy game:** A strategy RPG with a wide variety of abilities and weaponry for the player to use
- **2.5D side-scroller:** Side-scrolling combat platformer taking place in a 3D world

PERSONAL PROJECTS:

- **Wordle-like website:** A website created in summer 2022 using HTML that had over 30,000 users globally
- **3D design:** Followed a Blender beginner tutorial to learn 3D modelling. Used this skill in A-level Graphic Design
- **Developing various video games:** Using Unity and Unreal to create my own games
- **Summer 2021 game jam:** An event co-ordinated with a group of friends in which we each developed a game in 3 days (using Unity and C#)

AWARDS AND ACHIEVEMENTS

- **UKMT Junior Mathematical Challenge gold award (2016)** – An annual problem challenge in which I scored highest in my school
- **BAE Systems Make-It Challenge winning team (2017)** – An engineering and manufacturing competition for local high schools that our team won
- **Runshaw Maths Challenge winning team (2019)** – A mathematics competition held at Runshaw College, involving finding solutions to complex problems

INTERESTS

- **Video games** – Playing games casually and competitively helped me gain a strong understanding of game theory and game systems, which sparked my interest in designing my own games
- **Reading** – Non-fiction books written by industry professionals, such as game developers, as well as fantasy fiction
- **Playing guitar** – An interest I acquired in July 2022 and have since continued learning online
- **Tabletop gaming** – Involves creative activities such as worldbuilding, writing character backstories and painting miniatures
- **Cosplay** – Crafting costumes and props for costumes for comic conventions
